Excerpt:

Open your bottles now easily and one handed! Super easy to print! This opener is the coolest ever seen ;)

Description:

<p>Project video in Finnish (v.3.1): https://www.youtube.com/watch?v=gM_iu6jYxDA

</p><p>
</p><p>
PRINT WITH SUPPORT MATERIAL (there is a little overhang!)

</p><p>My first ever 3D creation!
Versio 4 (updated 23.6.14):
Now there is 4 different editions:
- Edition one: Basic OHBO
- Edition two: OHBO with magnet.
- Edition three: OHBO with a coin.
- Edition four: OHBO with magnet and a coin.
BTW: Other side (tail) of OHBO is meant to opening cans! (You can stick it under the clip)</p><p>Magnets from dx.com (here is a link: http://www.dx.com/p/10050078w-round-ndfeb-magnets-silver-50-pcs-239991)

</p><p>Coin is a basic 1cent euro coin.

</p><p>You will also need some super glue if printing a Edition 2,3 or 4.

</p><p>All editions are right scaled and tested. I recommend to print with 100% infill (layer height 0.2mm). My prints are PLA plastic but I think that ABS is even better because it is harder and stronger! I hope you to make one! I like to see how is your own bottle opener like!</p>

If you can, please use the online documentation found at <http://www.youmagine.com/designs/smart-one-handed-bottle-opener-by-kart5a> because those may have been be updated. Also, there you can interact and provide praise and/or feedback.
