Description:

<p>I'm a fist year student at the Fontys School of Fine and Performing Arts in the Netherlands. And after building two real wooden marble machines which you can find in the links below, I couldn't wait to explore the possibilities of 3D printing.</p><p>So I decided to model a marble machine for everybody. After a lot of tweaking I can say it is finally perfect and, easy printable for everybody.</p><p>[I used a Ultimaker2.</p><p>(And please do me the favor of uploading or sending me a photo when you printed is i am collecting those pictures :)
